

Child Life Wish List

Thank you for considering donating to our patients and families! The Department of Child Life, Creative Arts Therapy and School Programs helps patients and their families cope with hospitalization. Many children start their hospital visit in the Emergency Department. Families do not always have the chance to pack toys and comfort items for their children. By providing toys that meet children's developmental needs, and comfort items that help children feel safe in an unfamiliar environment, we can help patients and families have a positive hospital experience.

****Items in red and marked with an asterisk denote high demand/priority items**
