## Pocopson Township Feasibility Study

In February 2017, Pocopson Township submitted a Request for Proposal to conduct a feasibility study to determine the optimal use of two township facilities: the Township Administration Building at 740 Denton Hollow Road and the Eusebius Barnard House at 650 S. Wawaset Road. Nineteen architecture and design firms submitted proposals and three were selected for further interviews. At the July 24, 2017 Board of Supervisors meeting, the project was awarded to GKO Associates of Ambler, PA.

From September 2017 through June 2018, the Board of Supervisors held six checkpoint meetings with representatives from GKO. A number of draft iterations for both the Barnard House and the Administration Building were considered and the pros and cons of various options were assessed in light of financial, operational, and historic preservation impacts. In late August, the Board and Township staff met with GKO to review the latest designs for the two facilities.

**The results of the Facilities Feasibility Study will be shared at a Board of Supervisors work session on Tuesday, October 23<sup>rd</sup>, from 6:00 to 7:30 PM.** To allow greater attendance than the Administration Building can accommodate, the work session will be held at **Pocopson Home, 1695 Lenape Road.** The Board looks forward to input, questions, and feedback from the public regarding the feasibility study designs. After the meeting, presentation materials will be available at the Administration Building and on the Township website at **[pocopson.org](http://pocopson.org).**
